TODAY'S BEST INVESTMENT FOR SMALL SAVERS

Emplanation of Symbols used 1 C .- Cases 1 D .- Deaths.

NATIONAL SAVINGS CERTIFICATES

Available in three different series, maturing after 5, 7 and 12 years. The yield is 3%, 3.57% and 4.16% simple interest, respectively, at maturity. Thus, in the 12 year-certificates money increases by 50% on maturity, interest is free of income-tax and super-tax and is not taken into account in arriving at the total taxable income.

The certificates are obtainable from Post Offices doing Savings Bank business in denominations of Rs. 5, 10, 50, 100, 500, 1,000 and 5,000. An individual can invest upto Rs. 25,000 and two joint holders upto Rs. 50,000/-

Deposits accepted in multiples of Rs. 100 upto a maximum of Rs. 25,000 for a single depositor and Rs. 50,000 for two persons jointly. Interest at 3½% per ennum, free of income_tax and super-tax and which is not taken into account in assessing the total taxable income, is paid or remitted to the depositor's address every year. Deposits accepted at offices of the Reserve Bank of India at Bombay, Calcutta, Delhi and Madras and Branches of the Imperial Bank of India at other places transacting treasury business. Deposits are also accepted at all Treasuries in Part 'A' States at places where the Imperial Bank does not transact treasury business and at all Sub-Treasuries in Part 'A' States; elso at Treasuries at Bhuj (Kutch), Imphal (Manipur) and Coorg-Mercara (Coorg).

3½%

TEN-YEAR TREASURY SAVINGS DEPOSITS

For further information and/or rules governing these investments please write to the Provincial National Savings Officer of your State or the National Savings Commissioner, Gorton Castle, Simia-3.

Explanation of symbols used:—B.=Births: B.R.=Birth Rate; C.=Cholora; S.=Smallpox; P.=Plague; F.=Fovers; D.D.=Dysentery and Diarrhooa; R.D.=Respiratory Diseases; M.D.=Maternal Doaths; D.R.=Doath Rates; I.D.=Infantile

REMARKS

The figures of births and deaths shown in this statement for week ending the 8th August 1953, relate to 181 towns with an estimated population of 23,976 thousands. The total number of towns is 296 and their population is 36,140 thousands. Thus 61% of the total number of towns representing 66% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 15,634 and 8,011 representing birth and death rates of 33.9 and 17.4 per thousand of population respectively.

(A) States (Parts A & C):—The data here relate to 167 towns with an estimated population of 21,779 thousands. Information about Bihar and West Bengal could not be included. The total number of towns is 250 and their population is 30,790 thousands. Thus 67% of the total number of towns representing 71% of the total population is covered. The numbers of births and deaths recorded in these towns were 14,682 and 7,493 representing

birth and death rates of 35.1 and 17.9 per thousand of population respectively. The table at the end gives the position by States.

Chanda in Madhye Pradosh was the only town which recorded a high death rate of 71.8 per thousand of population and this high death rate was mainly due to deaths from Cholera.

(B) States (Part B):—The data here relate to 14 towns with an estimated population of 2,197 thousands. The total number of towns is 46 and their population is 3,350 thousands. Thus 30% of total number of towns representing 41% of total population is covered. The numbers of births and deaths recorded in these towns were 952 and 518 representing birth and death rates of 22.5 and 12.3 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
